Dear Black Tiger Tactical Systems,

This letter is in regard to the tactical handcuffing course that I took on March 1, 2010. I took this course to sharpen my skills of handcuffing in the field of Bail Enforcement. When I enrolled in this course I had already formed high expectations as I had viewed your online videos and I found them to be very informative and incredibly encouraging. When the class began I felt very comfortable with the style of teaching that the instructor, Abdul Mohamed, taught with. He is clear and precise, but the quality that stuck out the most was his knowledge of the many techniques that he shares. It is safe to say that I got far more from this course than I ever imagined going into it. One more quality that Abdul Mohamed possesses, one that cannot be over looked, is his patience. I imagine that there are many skill levels that go through these courses and I have no doubt that he can teach anyone these techniques with the many qualities that he has. I can guarantee that from this point forward, with the extensive list of courses that he offers, I will look no further than Black Tiger Tactical Systems for any future training courses that I will inevitably be enrolling in. In summation, this course met and exceeded any expectations that I had placed on it going into it. I appreciate everything that your company offers and I look forward to the next course I take on.

Sincerely,

Adam Hedglin
